Rāghavānanda Śarman

Setsuro Ikeyama

Flourished Rāḍha, Bengal, (India), 1591-1599

Rāghavānanda Śarman was a Brāhmaṇa who followed the Saurapakṣa school of astronomy. He composed several astronomical works in the late 16th century, including the *Viśvahita*, a set of astronomical tables whose epoch is 1591; the *Dinacandrikā*, another set of astronomical tables whose epoch is 1599; and the *Sūryasiddhāntarahasya*, a commentary on the *Sūryasiddhānta*, written in 1591. Little is known of these three works though they have been published.
